THE SHRI RAM SCHOOL

What is LeadershipPro™

Aspire's LeadershipPro™ Senior School Edition is a leading, 2-week outbound training program that nurtures high-schoolers as future impact leaders

The program is a residential program for Grade 9-12 school students. The program can be customized from 12 to 14 days in length. The program builds a strong foundation of values-based leadership and can help participants gain significant benefits through ten different experiential pedagogies.

The program is inspired by the age-old practice of Socratic Dialogues. Our content including case studies, has been originally developed by Aspire and has been augmented by case studies and exercises from Giving Voice to Values (GVV) Program. The Program will be jointly certified by Aspire and a leading US business school.

We have extensive experience in career-oriented training for young people with Global Certifications and Syllabi for our programs. We have received tremendous response and very positive reviews from students/ schools and international acclaim for our impact.

An inspiring and transformational program, it instils values-based, decision-making and leadership skills to prepare students for college & life

The program will help develop successful leaders using text-based Socratic Dialogues, enhancing their sense of awareness about ethics & values and developing their moral compass for life

Develop decision-making and leadership skills using business school-styled case studies and challenging situations where there is no perfect answer

Nurture young leaders through their preferred style of learning by providing ten different pedagogies during the program- e.g. soft skills, dramatics, adventure sports & community service (eligible for CAS)

Fill summer program gap in India with globally-benchmarked two-week program, worthy of a mention in their CVs/ Profiles, especially due to leading US Business School partnership

Provide emotional, intellectual and social growth for students through different experiential modes of learning in a safe and supportive environment

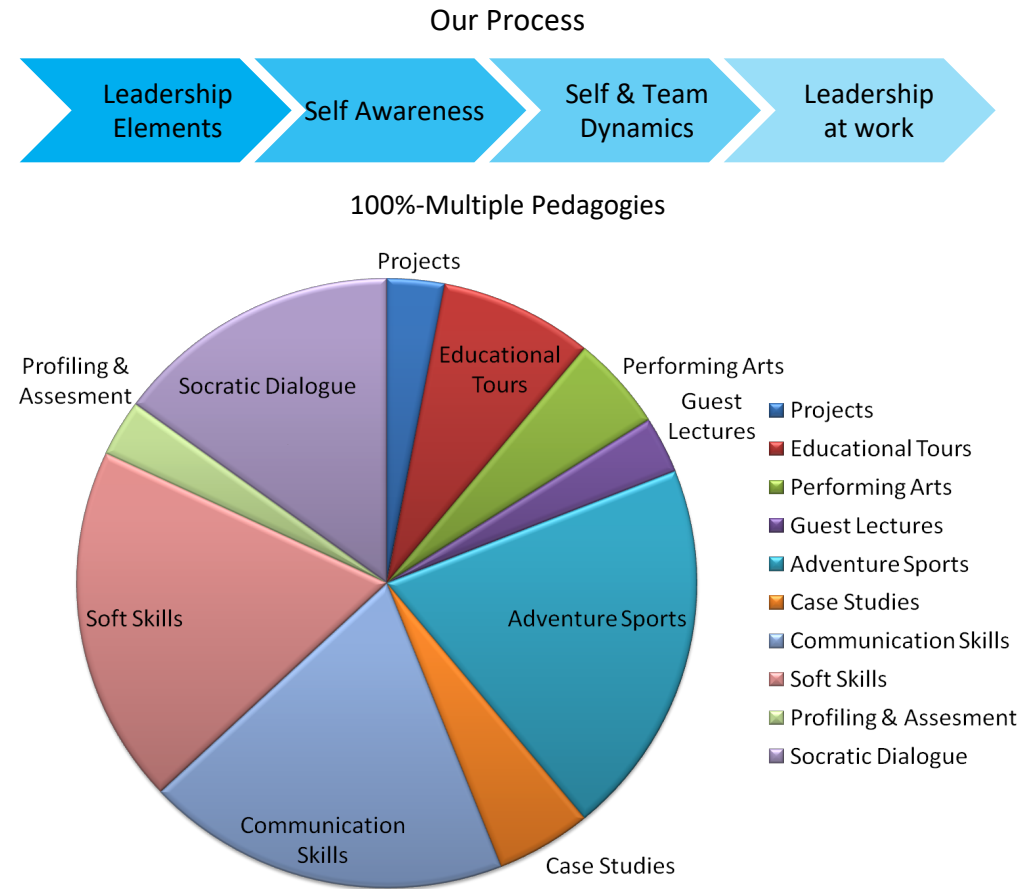

LeadershipPro™ Senior School Edition, originally created by Aspire in 2012, compares well with global benchmarks, and has been adopted by leading Indian schools

The program's experiential learning design, using Aspire's proprietary, four-stage leadership development approach has been successful since 2012

Our Approach:

- Our Program Core is text-based Socratic Dialogue, a 2500-year-old methodology
- Leadership Pro is interactive, experiential and fun. Uses 10 different pedagogies
- We believe young leaders must embrace values-based leadership skills early in life (Grade IX-XII) to shape their own moral compass
- Although leadership is a continuous process-non-linear and indiscrete, we have broken the process into four steps
- We use personalized counseling and psychometric testing for participants. We can build personal "leadership" approach in a scientific manner

Our Program draws on our experience and that of our mentor, Dr Mary C. Gentile, Director-GVV, Darden School of Business @ University of Virginia

GVV Program

- The Giving Voice to Values (GVV) curriculum is developed by Dr. Mary C. Gentile Professor of Practice at University of Virginia, Darden School of Business
- It is expounded in her book, Giving Voice to Values, through a series of case studies
- The Aspire Leadership Program uses GVV case studies and exercises to instill values and empower participants to act on those values in school, college, work and life
